# MAKERBOT<sup>®</sup> REPLICATOR<sup>®</sup> 2X

EXPERIMENTAL 3D PRINTER

## EXPERIMENT WITH DUAL EXTRUSION

- Be ready for cutting-edge developments in filament technology and multi-material 3D printing
- Add a new level of creativity to your 3D designs with interlaced colors
- Print in two colors through precisely aligned dual nozzles, without swapping filament or pausing your print
- Experiment with overhangs and internal structures using MakerBot Dissolvable Filament as solid infill material
- Completely reengineered, constant-force filament feeding system
- New thermal core design stabilizes the internal extruder temperature for more reliable prints

## OPTIMIZED FOR PRINTING WITH MAKERBOT ABS FILAMENT

- MakerBot ABS filament is a ductile petroleum-based thermoplastic filament with elastic deformation properties that make it good for snaps, living hinges, and threadability
- Superflat heated aluminum build plate is optimized for ABS:
  - Machined for crucial flatness to prevent warping or sagging that can affect build quality
  - Anodized for longevity and durability
  - Heated accurately and evenly with better temperature control
- Six-sided enclosure stabilizes ABS cooling:
  - Draft-blocking enclosure helps reduce uneven cooling, shrinking, and cracking
  - Magnetic lid snaps on and off for easy access
  - Clear-view top and sides let you monitor your progress and see the action
  - Friction-hinge door stays where you put it for easy and fast print retrieval

## WORLD-CLASS 100-MICRON LAYER RESOLUTION

- Create professional-quality, high-resolution prototypes and complex models
- Get smooth-to-the-touch surfaces that don't need sanding, finishing, or post-production
- Create realistic prototypes and models for demonstrations and presentations
- Choose settings that range from fast draft to finer resolution
